**Application and advantages:**

- Determination of the E-modulus and the yield and elastic strengths
- Quick, easy and uncomplicated handling
- Suitable for specimens with an initial gauge length  $L_0$  25 mm or more
- High measuring accuracy (exceeds all requirements of EN ISO 9513)
- Highest degree of operational reliability and long service life, even under rough operating conditions
- Bi-axial strain measurement possible in combination with e.g. MFQ-H

**Models:**

- MFA 2 (art. no.:15-019-000)
- Climatic chamber version (art. no.: 15-019-001)
- MFA 2 with extended measuring range (art. no.: 15-019-003)
- Double-sided version of the MFA 2 (art. no.: 15-019-010)

- Climate chamber version of the double-sided MFA 2 (art. no.: 15-019-011)

**Technical data:**

<b>Accuracy class</b>	Class 1 (standard) according to DIN EN ISO 9513 (optionally class 0.5)
<b>Measuring principle</b>	Strain gauge full bridge
<b>Measuring range</b>	2 mm (optionally 3 mm)
<b>Indication error</b>	0.2 % or 0.6 $\mu\text{m}$ (larger value is permissible)
<b>Linearity error</b>	0.05 %
<b>Actuating force</b>	10-60 cN
<b>Temperature operating range</b>	1° - 60°C (optional: climatic chamber version up to 200°C)
<b>Weight</b>	190 g (double-sided 260 g)
<b>Standard initial gauge length <math>L_0</math></b>	25, 30, 50 mm (25 mm by turning the blades)
<b>Specimen diameter, thickness and width</b>	0-30 mm (others on request)
<b>Scope of delivery</b>	Strain gauge complete with sensor plug incl. HSS cutting edges round $\varnothing$ 9.5 mm
<b>Required accessories (optionally available)</b>	Data acquisition card for control
<b>Note</b>	Measuring blades are wearing parts
